

## Quick coupling

Stainless steel couplings for connection between mixer and shower hose. With a quick coupling mounted it is possible to disconnect the shower hose when not in use. This is a requirement for installations within health care.

This coupling can be used for all mixers with a 1/2" connection for the shower hose. 2907-0000 connects to the outlet of the mixer (1/2") and 2907-1000 connects to the shower hose (1/2").

**Article number:** 29070000

**Description:** A. Connects to mixer

- Stainless quick connectors G1 / 2 "for connection between the mixer and the shower hose
