Backflow protection unit type

MEDICARE hospital mixer

MEDICARE hospital mixer has been developed for environments with particularly high hygiene and safety requirements. The mixer is designed to be operated without the hands coming into contact with the spout, which reduces the risk of contamination and helps create a more hygienic working environment.

Its robust construction is designed for the healthcare sector and ensures reliable performance in daily use. Well-thought-out design and strategically positioned controls provide excellent control in situations where hygiene procedures and workflow are crucial. A safe, professional choice for surgical and hygiene-sensitive environments.

About the collection

MEDICARE is FM Mattsson's range of products for healthcare and care settings with high requirements for hygiene, safety and accessibility. The products are made from lead-free brass and combine a construction designed for easy cleaning with well-thought-out design, ergonomic controls and safe temperature settings. With a 10-year spare parts guarantee, Medicare is a reliable, long-term choice for professional installations.
